technical support and dialing with projects , since 01/01/2018 until 01/01/2020.
 - Company website : <https://samanet.sy/>

Projects :

- Programing solution (python project)

Solve http proxies changing source port for subscribers that have a private ip address (NATED IP users) .

This solution has been solve the problem on proxy servers

Which is changing the subscribers (NATED) source port number problem,

The solution made by python programing language to interact with Linux OS and push iptables NAT Rules , in addition to re-designing http traffic flow inside Data Center .

- Programming Solution (Python Project)

- Solving HTTP Proxy Source Port Issues for NATed IP Users

Developed a Python-based solution to address the issue of HTTP proxies changing source port numbers for subscribers using private (NATed) IP addresses. This solution interacts with the Linux OS to dynamically manage iptables NAT rules, ensuring consistent source port handling. Additionally, it involved redesigning the HTTP traffic flow within the data center.

- Programming Solution (Python Project with PRTG)

Developed a Python-based solution integrated with the PRTG monitoring application to retrieve L2TP tunnel and session information from LNS (L2TP Network Servers) and visualize the data in PRTG for real-time monitoring and analysis.

- System / Network Project

- VPS Service Solution for ISP Subscribers

Designed and implemented a VPS service solution for ISP subscribers using ESXi servers and vCenter. The solution includes essential service components such as reverse DNS, a managed network environment, rate-limited speed for each VPS, and scheduled backups to ensure reliability and performance

- **Worked with Sama net ISP / Asraanet** for Internet Service Provider **as Senior Network & Projects Consultant** , since 01/01/2016 until 01/03/2017.
- Company website : <https://samanet.sy/>

Projects :

- Traffic management design (supper Mega Service):
designing new solution for Traffic management for each ISP subscriber by apply BasedTime QOS.

- **Worked at Sama net ISP / Asraanet** for Internet Service Provider as NOC administrator since 25/03/2014 until 01/12/2015.

Manage all network equipment's cisco and Huawei devices ,

Projects:

- Forced First-Page Advertising for Subscribers
mplemented a new service at the ISP using Squid and Squid-Splash to display a forced first-page advertisement on subscribers' browsers. This feature can be applied to some or all subscribers based on policy settings, providing a targeted advertising solution.
- enhanced the APP store and Google paly applications on subscriber's mobiles.
